

Microsoft® 365 Introduction to Power Apps

Training Course Content

Course Objective: Students will plan, design, build, test, and deploy low-code applications using Microsoft® Power Apps®, including both canvas and model-driven app types, to address specific business needs.

Prerequisites: To ensure your success in this course, you should have basic Windows navigation skills and experience using Microsoft 365 applications such as Word and Excel®. No prior app development experience is required.

Lesson 1: Getting Started with Microsoft Power Apps

- Introduction to Microsoft Power Platform
- Introduction to Power Apps
- Select App Types to Address Business Needs

Lesson 5: Testing and Deploying Apps

- Validate App Functionality and Data Behavior
- Share apps with users and manage permissions
- Update and maintain published apps

Lesson 2: Planning and Designing Apps

- Identify business requirements for a Power App
- Design app structure and user experience

Lesson 3: Building Canvas Apps

- Create an App from a Blank Canvas
- Create an App from a Template

Lesson 4: Building Model-Driven Apps

- Create Model-Driven Apps
- Add Visualizations and Reports
