

Microsoft® Office Excel 2016: Level 2

Training Course Content

Course Objective: Students will learn to sort and filter data, perform complex calculations and functions, and analyze data using PivotTables and charts.

Prerequisites: To ensure your success, we recommend that you have experience with creating, editing, formatting, saving, and printing spreadsheets in Excel. Knowledge of formulas and functions is also necessary (SUM, MIN, MAX, AVERAGE, IF, and applying absolute referencing). Students can obtain this level of skill through our Level 1 course.

Contact us to discuss if this level is right for you.

What's New in 2016: New and improved Quick Analysis tools now make it easier than ever to utilize the exciting new features. Excel is now capable of making recommendations for charting options based on your data. Create powerful charts easy with the new improved chart types, like Waterfall, Sunburst, Histogram, or Box and Whisker charts. Excel is packed with exciting new templates, improved Pivot Table enhancements, and Multi-select slicer feature to make your workload easier.

Delivery Method: Instructor-led, group-paced, hands-on classroom training with activities. Additionally, manuals are provided for each student for after class reference.
